# SUPER CONSTELLATION

## „Star of Switzerland“

### ABOUT MY PHOTO BOOK

From 2004 to 2019 I was privileged to be part of the Super Constellation Flyers Association's flying program as both a photographer and "Maître de Cabine." My first encounter with the "Camarillo Connie" was in California where I photographed its departure for Switzerland and preparations leading up to the flight. I later had the privilege of becoming a crewmember on the "Star of Switzerland" during her flights from Bern, Geneva, Basel and Hamburg.

Flights on this aviation icon from a bygone era were an incredible experience that I will never forget. If your heart beats for aviation and you get the opportunity to fly on a Super Connie in the Swiss Alps, you feel a surreal bond to the sky. I've shared my enthusiasm for this aircraft in this book and want to share it with all aviation enthusiasts...especially Connie fans.
